

Ice Destroyer

Special ice disturber.

Specifications:

- Functions even in low temperatures
- Breaks down ice immediately after application
- Non-aggressive to surfaces
- Environmentally friendly

Advantages:

- Can be used in temperatures as low as -45°C
- Has immediate and long-term effect
- Can be used on various types of surfaces
- Biodegradable

Applications:

ICE DESTROYER is a special mixture in granule format, which is suitable for eliminating ice of various thicknesses. The ice is turned into water, which leads to its ecological decomposition. **ICE DESTROYER** has immediate and long term effects. It can be used on various types of surfaces: interlocking pavement, concrete, asphalt, wooden floors, laminated floors, plastic and glass surfaces.

In Winter periods it often happens that ice forms. Ice in the driveway, hallway or workshop can cause serious injuries to personnel or can be the cause of van, truck or various other moving manipulation equipment accidents (particularly forklifts moving around the factory premises). For immediate elimination of this danger, and an increase in the safety of personnel and prevention of needless damage to assets, use **ICE DESTROYER**.

Order codes:

Name	Storage code	Package	Volume / Size	Order number
Ice Destroyer	RICE	Container	10 kg	R 30300

Instructions for use:

ICE DESTROYER can be applied by hand or with the help of a special disperser. Treat the area to be de-iced with a layer of **ICE DESTROYER**. For a larger layer of ice and in extremely cold temperatures it is important to apply a thicker layer of **ICE DESTROYER**. The preparation has immediate and long-term effects and can be used preventatively if ice formation can be predicted or expected. Always close the container with the attached lid after use.

ONLY FOR PROFESSIONAL AND INDUSTRIAL USE!
